The following is an examiner's statement of reasons for allowance: The prior art does not disclose a catapult device including a support structure; a pivot bracket having a bearing, pivotally mounted on the support structure; a lever arm pivotally mounted to the support structure and engageable with the pivot bracket; a motion translation arrangement having a spring, coupled to the lever arm and engageable with the bearing; and a pivot arm for holding an object to be hurled, pivotally mounted to the support structure and the motion translation arrangement, such that initial movement of the lever arm develops a spring force in the motion translation arrangement, but the motion translation arrangement is prevented from moving due to contact with the bearing; and further movement of the lever arm pivots the pivot bracket and bearing away from the motion translation arrangement, allowing the pivot arm to pivot and hurl the object.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
